SEARCH AND RESCUE JOINT HEALTH AND SAFETY COMMITTEE UPDATE

Presentation to Provincial Workshop

February 6, 2016

SAR Volunteer Joint Health and Safety Committee

- Co-Chair Ian Cunnings, Senior Regional Manager, EMBC
- Co-Chair Jim McAllister, Director at Large, BCSARA
- Andrew Morrison, SAR Specialist, EMBC
- Brian Lamond, Director at Large, BCSARA, North Peace SAR
- Mike Hudson, South Columbia SAR
- Rod Mudie, Campbell River SAR

Current Safety Related Projects

- Swiftwater
 - NIF funding remaining for training
 - Rope systems in Swiftwater environment testing
 - On-line awareness training
 - Operation level training for group members
- Rope Rescue NIF
 - Project Management Team in place
 - Contract awarded for rope system testing
 - Contract for curriculum development
 - Meeting of JIBC Instructors

Current Safety Related Projects

- CDFL Manual
 - Working Group has developed training manual
 - Meeting of CDFL and winch providers
 - Funding from survivors
 - Requirements for any new CDFL teams
- Safety Officer Training
 - Review of what is available suitable for B.C.
 - Development of course and materials
 - Course(s) offerings
 - Funding from EMBC

Current Safety Related Projects

- Leadership Course
 - Additional material added to existing Public Safety Lifeline Leadership course
 - Designed to be cross technical discipline applicable
 - Work almost completed, several course offerings this year

Current Safety Related Projects

- Provincial Operating Guidelines under review
 - Watercraft; working group formed
 - Cave Rescue; removing detailed processes
 - Underwater Recovery; in discussion with RCMP
 - ATV; change in terminology from provincial legislation, helmet requirements for UTV
 - Winter Response; currently Avalanche POG
 - Risk Assessment; to incorporate RADeMS (complete)

A Safety Culture in SAR

- Change from a training base to ensuring all volunteers understand their roles, responsibilities, and rights
- Using SAR specific language and standardized terminology
- Developing guidelines that achieve the balance of safety and response ability
- Instilling a risk assessment culture rather than prescriptive rules

Swiftwater as a Example

AVALANCHE TERRAIN RATING

Terrain definitions available at www.avalanche.ca

*Use elevation specific danger rating. **Use highest danger rating

Winter Response as Example

Culture of Safety

- Records
 - Training; personal and group, recertification tracking
 - Incidents; near misses, incidents with loss, injuries
 - Investigations of incidents
 - Inspections; vehicle, equipment, facilities
 - Minutes of safety committee/group meetings with health and safety discussions

Culture of Safety

- Postings
 - Access to Safety Program Guide, Provincial Operating Guidelines, Group Operating Guidelines
 - Minutes of Joint Health and Safety committee, and Group Health and Safety Committee/group meetings
 - Safety reminders, eg EADeMS posters and stickers
 - Safety Advisory Notices/Seasonal Safety Messages
 - Investigation reports

Culture of Safety

- Safety in training
 - Appointing Safety Officers to provide experience
 - Ensuring awareness level training is provided for all, eg Swiftwater, Avalanche
 - Use of RADeMS for all tasks
 - Reinforcement of the safety responsibilities and rights of members
 - Safety as a item during debriefings
